ALLIANZIM
BUFFERED ETFS

The perks of the 6-month reset

Explore the AllianzIM Buffered ETF lineup

Built to help mitigate risk and lower volatility, Allianz Investment Management LLC (AllianzIM) U.S. Large Cap 6 Month Buffer¹⁰ exchange-traded funds (ETFs) seek to match the returns of the reference asset up to a stated upside Cap, while providing a Buffer against the first 10% of reference asset losses for the currently effective Outcome Period.

6-MONTH OUTCOME PERIODS CAN PROVIDE:

- More market-relevant Caps, with **two resets per year**
- The potential for a greater level of downside mitigation with a 10% Buffer over **a shorter time period**
- More opportunities for tactical applications
- A potential alternative to shorter-term, low-yielding instruments

| Tickers | SIXJ | SIXO |
|-----------------------|---------------|---------------|
| Reference asset | S&P 500 (SPX) | S&P 500 (SPY) |
| Downside attribute | 10% Buffer | 10% Buffer |
| Outcome Period length | 6 months | 6 months |
| Funds in series | 2 | 2 |
| Series months | Jan/Jul | Apr/Oct |

The S&P Price Index and SPDR S&P 500 ETF Trust are broad measures of U.S. large-cap stocks and do not include the reinvestment of dividends. One cannot invest directly in an index.

As part of one of the largest asset management and diversified insurance companies in the world, Allianz Investment Management LLC (AllianzIM) is a registered investment adviser and wholly owned subsidiary of Allianz Life Insurance Company of North America.

FLEX Options Risk. The Fund will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation (“OCC”). The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

FLEX Options are customized equity or index options contracts that trade on an exchange, but provide investors with the ability to customize key contract terms like exercise prices, styles, and expiration dates. An options contract is an agreement between a buyer and seller that gives the purchaser of the option the right, but not the obligation, to buy (in the case of a call option), or to sell (in the case of a put option), a particular asset at a specified future date at an agreed upon price (commonly known as the “strike price”).

Investing involves risk, including possible loss of principal. There is no guarantee the funds will achieve their investment objectives and may not be suitable for all investors.

Investors may lose their entire investment, regardless of when they purchase shares, and even if they hold shares for an entire Outcome Period. Full extent of Caps and Buffers only apply if held for stated Outcome Period and are not guaranteed. The Cap may increase or decrease and may vary significantly.

An investor who purchases Fund Shares after the Outcome Period has begun or sells Fund Shares prior to the end of the Outcome Period may experience results that are very different from the investment objective sought by the Fund for that Outcome Period. There is no guarantee that the Cap will remain the same after the end of the Outcome Period.

Investors should consider the investment objectives, risks, charges, and expenses carefully before investing. For a prospectus with this and other information about the Fund, please call 877.429.3837 or visit www.allianzIMetfs.com and review the prospectus. Investors should read the prospectus carefully before investing.
