

NYSE: NVBT

ALLIANZIM BUFFERED OUTCOME ETFS

AllianzIM U.S. Large Cap Buffer10 Nov ETF

Institutional risk management for the retail investor

A new approach to risk management – Built to help mitigate risk and lower volatility, Buffered Outcome ETFs are designed to allow investors to participate in the growth potential of the equity markets up to a stated Cap, with an explicit downside Buffer.

Risk aversion may lead to lost opportunities

By the numbers:

- **72%** of investors are willing to give up some potential gains for a vehicle that protects from loss¹
- 9 in 10 households have a **conservative or moderate risk tolerance**²
- **\$27.7 trillion in cash is currently on the sidelines** with little to no growth opportunity³

Exchange	NYSE Arca
Reference Asset	SPDR® S&P 500® ETF Trust

The AllianzIM U.S. Large Cap Buffer10 Nov ETF (the “Fund”) seeks to match the share price returns of the SPDR® S&P 500® ETF Trust (SPDR S&P 500 ETF Trust) up to a stated upside Cap, while providing a Buffer against the first 10% of the SPDR S&P 500 ETF Trust losses for the currently effective Outcome Period from November 1, 2022 to October 31, 2023.

The Fund intends to invest substantially all of its assets in FLEXible EXchange® Options (FLEX Options) on the SPDR S&P 500 ETF Trust. FLEX Options are customizable, exchange-traded options contracts guaranteed for settlement by the Options Clearing Corporation. The outcome may only be realized for an investor who holds the shares on the first day of the Outcome Period and continues to hold them on the last day of the Outcome Period.

There is no guarantee that the outcomes the Fund seeks will be realized or that the Fund will achieve its investment objectives. Full extent of Caps and Buffers only apply if held for the stated Outcome Period but are not guaranteed.

The Buffered Outcome ETFs investment strategies are different from more typical investment products, and the Funds may be unsuitable for some investors. It is important that investors understand the investment strategy before making an investment. For more information regarding whether an investment in the Funds is right for you, please see the prospectus including “Investor Considerations.”

RISK MANAGEMENT IS IN OUR DNA

As part of one of the largest asset management and diversified insurance companies in the world, Allianz Investment Management LLC (AllianzIM) maintains a long track record of developing and executing risk management strategies with \$18.8 billion in AUM.¹

Based in Minneapolis, our investment management is powered by the same proprietary in-house

hedging platform that is used among affiliates to help manage >\$149 billion in assets for institutional and retail investors around the globe.¹

AllianzIM is a registered investment adviser and wholly owned subsidiary of Allianz Life Insurance Company of North America. Both are part of Allianz Group.

¹Values as of June 30, 2022.

POSSIBLE OUTCOMES WHEN INVESTING IN BUFFERED OUTCOME ETFS

* Please note this graph is provided merely to illustrate the outcomes that the Fund seeks to provide based upon the price of the reference asset. The fund may experience losses greater than 90%.

The returns may only be realized if investors are holding shares at the beginning of the Outcome Period and continue to hold them on the last day of the Outcome Period. If an investor purchases shares after the Outcome Period has begun or sells shares prior to the Outcome Period's conclusion, he/she may experience investment returns very different from those that the Fund seeks to provide. There is no guarantee that the Fund will successfully achieve its investment objective.

This graph is hypothetical and provided merely to illustrate the outcomes that the Fund seeks to provide based upon the performance of the reference asset. It does not reflect the deduction of fees, which would reduce the performance.

The full extent of Caps and Buffers only apply if held for stated Outcome Period. There is no guarantee that the Cap will remain the same after the end of the Outcome Period. The Cap may increase or decrease and can change significantly. For current information on the Fund's Remaining Cap, Remaining Buffer, and downside exposure before Buffer, please visit www.allianzIMetfs.com.

FLEX Options Risk. The Fund will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation ("OCC"). The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

FLEX Options are customized equity or index options contracts that trade on an exchange, but provide investors with the ability to customize key contract terms like exercise prices, styles, and expiration dates. An options contract is an agreement between a buyer and seller that gives the purchaser of the option the right, but not the obligation, to buy (in the case of a call option), or to sell (in the case of a put option), a particular asset at a specified future date at an agreed upon price (commonly known as the "strike price").

Investing involves risks. Loss of principal is possible. The Funds face numerous market trading risks, including active markets risk, authorized participation concentration risk, buffered loss risk, cap change risk, capped upside return risk, correlation risk, liquidity risk, management risk, market maker risk, market risk, non-diversification risk, operation risk, options risk, trading issues risk, upside participation risk, and valuation risk. For a detailed list of fund risks see the prospectus. The Fund's investment objective intends to provide return attribute characteristics that are distinct from traditional strategies. It is important that an investor understand these characteristics before making an investment in the Fund.

Investors may lose their entire investment, regardless of when they purchase shares, and even if they hold shares for an entire Outcome Period. Full extent of Caps and Buffers only apply if held for stated Outcome Period and are not guaranteed. The Cap may increase or decrease and may vary significantly.

Investors should consider the investment objectives, risks, charges, and expenses carefully before investing. For a prospectus with this and other information about the Fund, please call 877.429.3837 or visit www.allianzIMetfs.com to review the prospectus. Read the prospectus carefully before investing.

The Fund intends to invest substantially all of its assets in Flexible EXchange® Options ("FLEX Options") on the SPDR® S&P 500® ETF Trust ("SPDR S&P 500 ETF Trust"). FLEX Options are customizable exchange-traded options contracts guaranteed for settlement by the Options Clearing Corporation. The Fund uses FLEX Options to pursue a Buffered Outcome strategy that seeks to achieve investment outcomes based upon the performance of an underlying security or index at the end of the Outcome Period. The outcomes sought by the Fund, which include the Buffer and Cap ("Buffer and Cap"), are based upon the performance of the SPDR S&P 500 ETF Trust over the period of November 1, 2022 through October 31, 2023. This period is referred to as the "Outcome Period." Following this initial Outcome Period, each

subsequent Outcome Period will be a one-year period from October 1 to September 30. The Fund will not terminate after the conclusion of the Outcome Period. After the conclusion of the Outcome Period, another will begin. There is no guarantee that the outcomes sought for an Outcome Period will be realized. It is expected that the Cap will rise or fall from one Outcome Period to the next. There is no guarantee that the Cap will remain the same upon the conclusion of the Outcome Period.

The Fund only seeks to provide shareholders that hold shares for the entire Outcome Period with a Buffer against the first 10% of SPDR S&P 500 ETF Trust losses (based upon the value of the SPDR S&P 500 ETF Trust at the time the Fund entered into the FLEX Options at or near the beginning of the Outcome Period) during the Outcome Period. You will bear all SPDR S&P 500 ETF Trust losses exceeding 10% on an expected one-to-one basis. The Buffer is provided prior to taking into account annual Fund management fees equal to 0.74% of the Fund's daily net assets, transaction fees, and any non-routine or extraordinary expenses incurred by the Fund. A shareholder that purchases shares at the beginning of the Outcome Period may lose their entire investment. While the Fund seeks to limit losses to 90% for shareholders who hold shares for the entire Outcome Period, there is no guarantee it will successfully do so.

The outcomes are based on the Fund's net asset value, the per share value of the Fund's assets ("NAV"), at the beginning of the Outcome Period. The Fund's assets are expected to be principally composed of FLEX Options, the value of which is derived from the performance of the underlying reference asset, SPDR S&P 500 ETF Trust. However, because the value of the underlying FLEX Options is affected by, among other things, changes in the value of SPDR S&P 500 ETF Trust, changes in interest rates, changes in the actual and implied volatility of SPDR S&P 500 ETF Trust, and the remaining time until the FLEX Options expire, the Fund's NAV will not directly correlate on a day-to-day basis with the returns experienced by SPDR S&P 500 ETF Trust. While the Fund's investment adviser, Allianz Investment Management LLC, generally anticipates that the Fund's NAV will move in a similar direction as SPDR S&P 500 ETF Trust, the Fund's NAV may not increase or decrease at the same rate as SPDR S&P 500 ETF Trust, and it is possible they may move in different directions. During the Outcome Period, the movement of the Fund's NAV is not anticipated to match that of SPDR S&P 500 ETF Trust.

The Fund's website, www.allianzIMetfs.com, provides important Fund information (including Outcome Period start and end dates and the Cap and Buffer), as well as information relating to the potential outcomes of an investment in the Fund on a daily basis. If you are contemplating purchasing shares, please visit the website. Investors considering purchasing shares after the Outcome Period has begun or selling shares prior to the end of the Outcome Period should visit the website to fully understand potential investment outcomes.
